

Dominos 1-9

Ce fichier contient trois formes du jeu de domino formé des nombres de 1 à 9.

Les règles sont identiques dans les trois jeux. Comme dans le jeu traditionnel, on prend six doubles carrés dont on cherche à se débarrasser en allongeant une ligne où deux dominos se collent soit :

- parce qu'ils ont un nombre en commun,
- parce que la somme des deux nombres accolés est 10.

Si on ne peut allonger la ligne, ... on pioche.

1 - Dominos-points

Les nombres sont figurés sous forme de constellations non-standard.

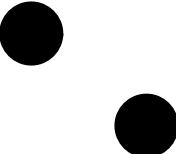

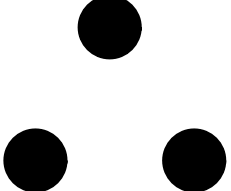

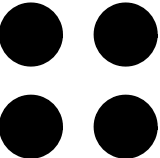

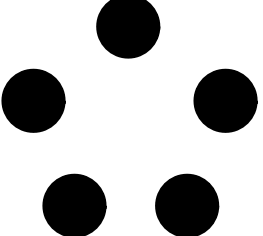

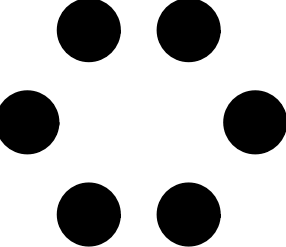

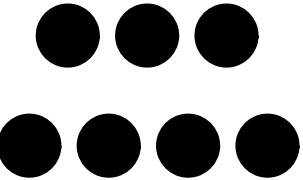

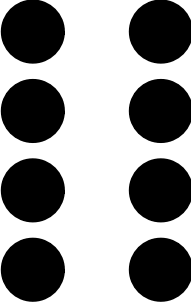

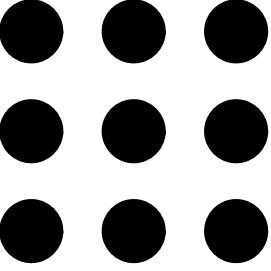

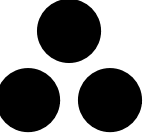

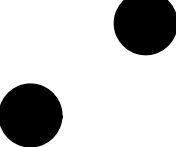

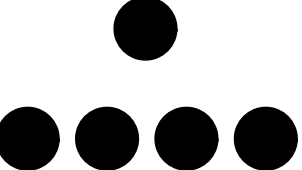

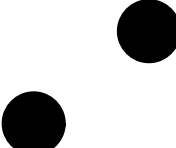

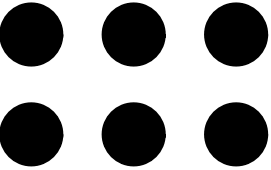

2 - Dominos cubes-points

Les nombres sont figurés sous forme d'une constellation à droite et de cubes et barres à gauche.

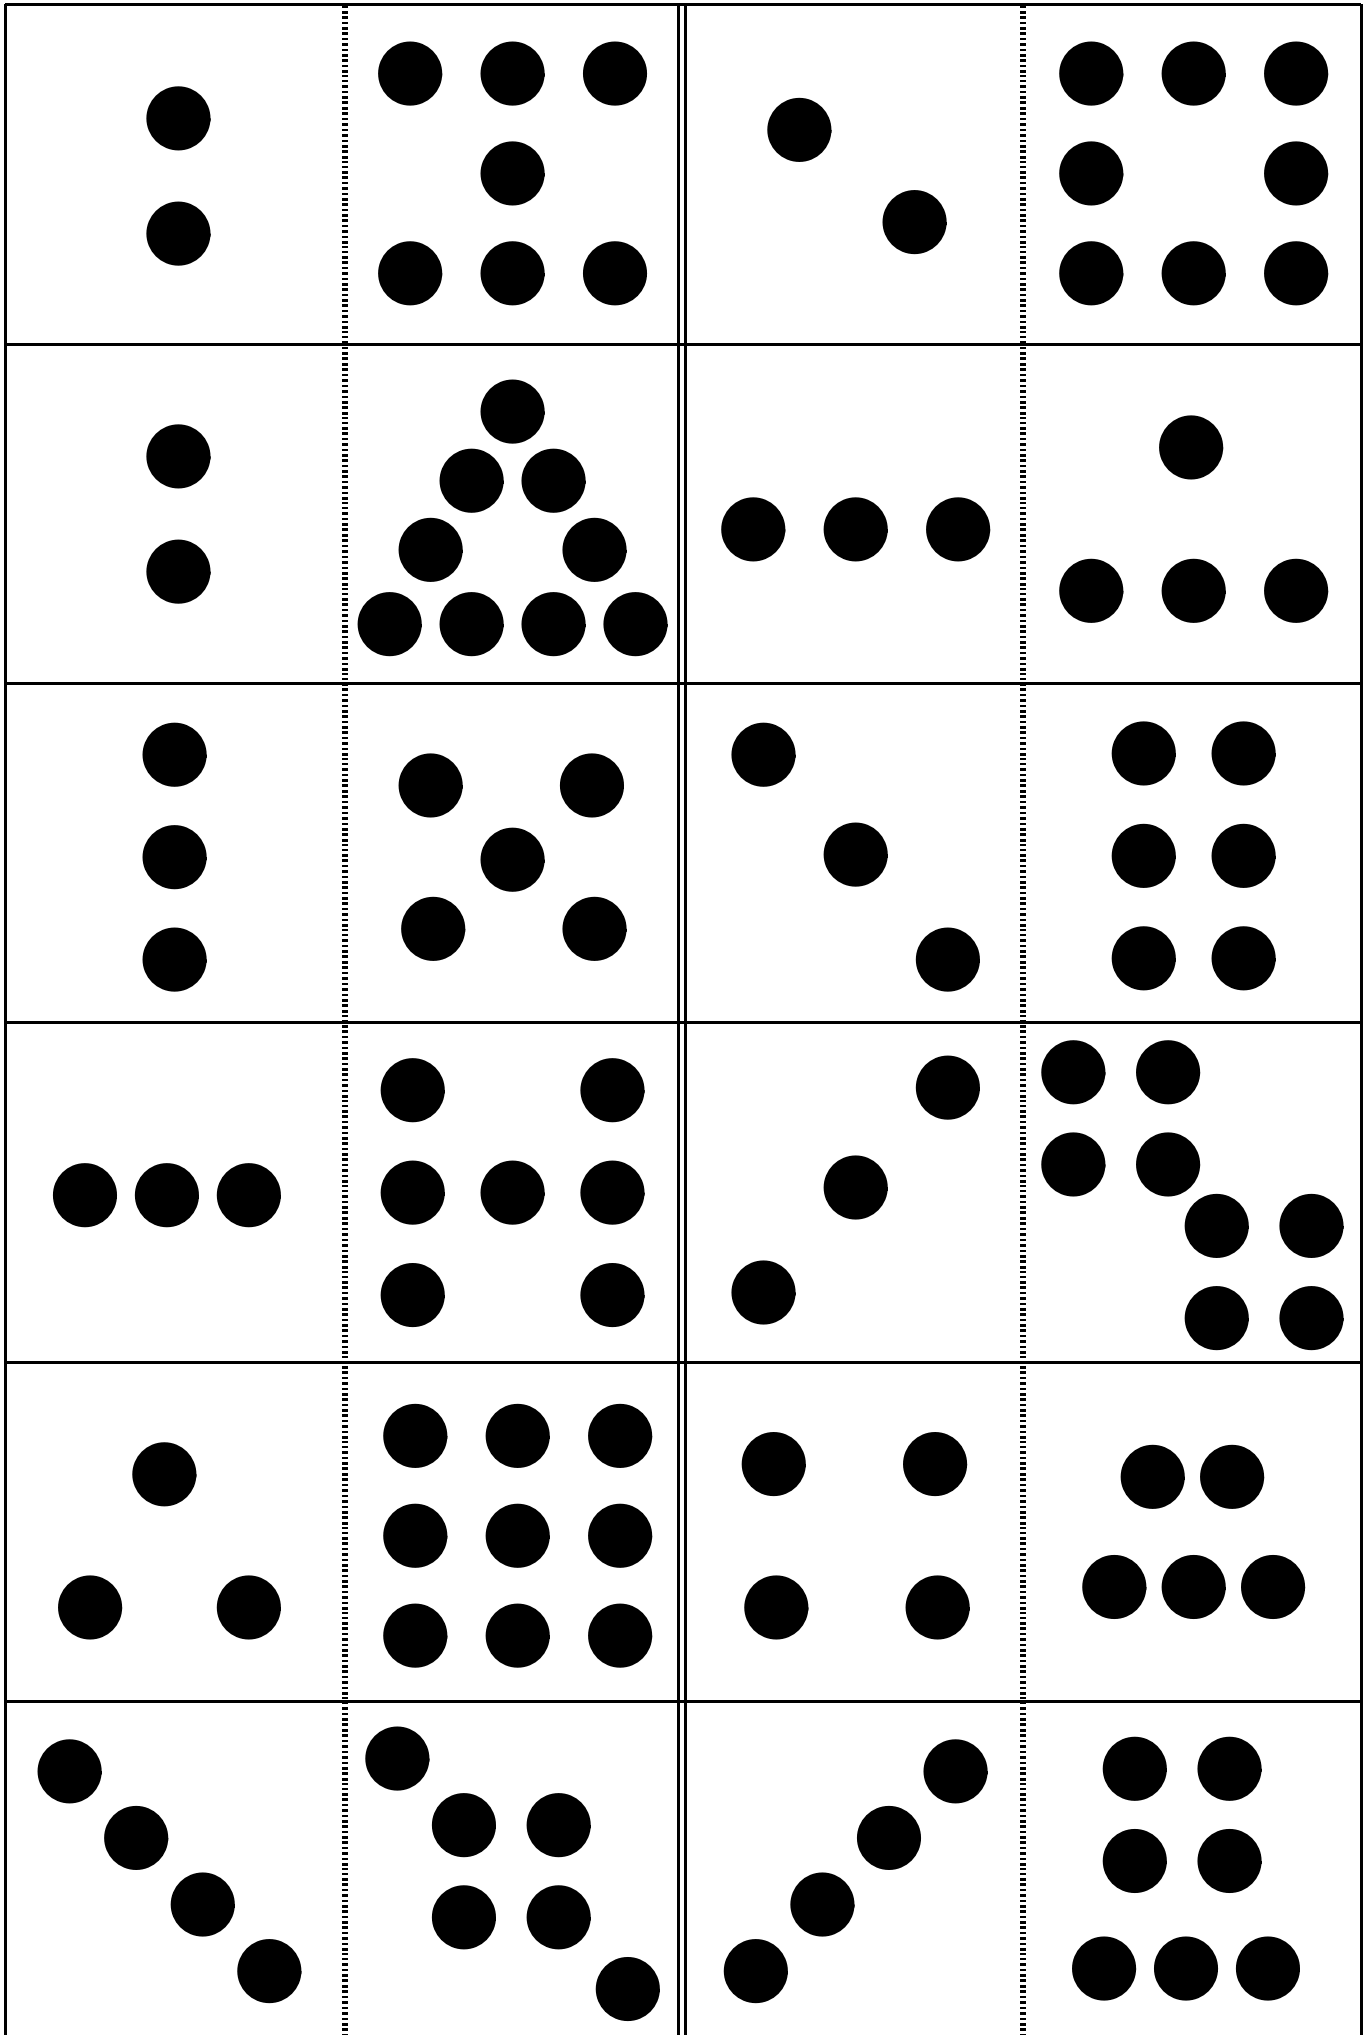

3 - Dominos cubes

Les nombres sont figurés sous forme de cubes et barres à droite et à gauche.
